Daniel Dinca

I m Web Developer, Front-end and Back-End Dev. I practice this for 4 years and I like it very much ! Now, i have **16 years old**. I love all about computers ! **I prefer the back-end part**, I'm more attracted to that.
In first year I've learned about how things works in all about computers, from how a CPU reads and works, to how compilers give informations to all computer components.
In second year I've started learning about Front-End part, from HTML to Sass to React.
In third year I've learned about automtization, I've done that with Python, AWS, Linode and Azure Servers. I automated 90% of my daily tasks.
And now, 4th year, I started learning about **Back-End** and I'm seriously and decided to stay on this side of Web Development. I've learn about
PHP, NodeJS, start using AWS, Linode and Azure Servers for Back-end and using Databases.

Work Experience

Back-End Web Developer	ian 2022 - mai 2022
MANU Vermietung, Remote	
Freelancer	mai 2022
Freelancer, Remote
